

## **Nutty Putty 2023 Information sheet**

We will start big bikes 2 bikes at a time every 30 seconds. At the start is the only time you will start with another bike. The start of test 2, 3 and 4 will be one bike at a time. Loop 2 is the same loop, we run the same loop twice.

For big bikes, loop is approximately 36 miles long, broken up into two large tests approx. 18 miles each. When you finish test one, you will be at the staging area for test 2, you can choose to take a break there, or proceed right to the start of test 2. You will get your start row based on pre-sign, if you sign up day of, you risk starting on the last row, regardless of skill level.

Remember Enduro etiquette!!! This is a timed race, if someone catches you, let them by, you are not racing them, you are racing the clock. They already made up time on you and you are slowing them down.

You must complete one loop to get a finish.

Mini pits will be European style, meaning you can choose to come thru the pits or continue on the race course if you do not need to stop. Approx 9-10 mile loop for mini bikes.

Mini Bikes run for 1 hour from the start of the last wave.

Free camping in pit area, please no fires.

Pee Wee A will be approx 2-3 mile course, electric bikes, we recommend you do not run on full power mode, most will not go the full ½ hour. "Mode 2" seems to work well for others, but it is up to you to know the range of your bike.

Pee Wee B will be less than 1 mile, you can see the entire course

All USRA rules apply, please visit [www.raceusra.com](http://www.raceusra.com) for complete rules- correct color combinations and numbers are required!! If you do not have correct color combo or numbers, you will have to buy pie plates or risk DQ.
